TEXT CELL FORMATS :-

> = right ^ = center # = program title

NAMING RANGES: <NAME> A1,A20

Numbers as Text Entering are precieded by "

Algemeen

\+ - Voor het invoeren van een Formule anders dan voorafgegaan door "@"(apestaart), begint men met een "+"-teken.

Bij commando's die een reeks cellen betreffen (RANGE COMMANDS, "Copy" etc.), waarbij de cell-indicaties door een komma van elkaar worden gescheiden, hoeft men de celnamen niet in te vullen maar kan men met de cursor naar de desbetreffende cel gaan en op RETURN drukken, net als in SYNCALC.
